STRAWBERRIES AREN'T JUST FOR SUMMER...

Laser Lipo have taken the country by storm with the launch of their newest class 3B laser machine. The **STRAWBERRY**, as it has been named, offers a range of new and exciting treatments, following the company's marketing slogan of "looking good is feeling good"

The celebrity and press launch in Soho attracted a selection of wellknown figures including the Queen's hairdresser Ian Carmichael, Nick Ferrari, Burt Kwouk to name just a few.

Miss Cindy Jackson, holder of the World Record for the most cosmetic procedures, has not only tried the treatments but has now endorsed the **STRAWBERRY** and even promotes it on her website www.cindyjackson.com.

The **STRAWBERRY** was launched to the trade at the Professional Beauty show, in Manchester and the interest has been phenomenal. Laser Lipo even had people queuing to have one of the free treatments offered on the stand.

The show was a major success and orders are now being fulfilled with **STRAWBERRIES** going into London, Kent, Hampshire, Shropshire, West Midlands, Nottinghamshire, Sussex and Surrey, as well as substantial interest from distributors around the world.

Mrs Sharon Cobley explained why she considers that this British Made product is set to revolutionise the industry.

STRAWBERRY - Inch-loss has set new standards with treatment times of only 10 mins! The results achieved are simply amazing, especially considering that they are non invasive and do not require starvation diets and hours in the gym. No other machine can treat an entire stomach area in just 10 minutes.

STRAWBERRY - Stretch marks. This treatment breaks new ground in the beauty industry. Until now the only stretch marks that can be affected with lasers are new red marks. Now with a specially formulated selection of class 3B lasers, the treatment can now improve even the older white/silver marks. Results have shown that these treatments can reduce the marks by up to 70%.

STRAWBERRY - Eye bags. Never before has there been a non invasive method of reducing eye bags and the dark patches under the eyes. This treatment can wipe away both hereditary and lifestyle dark patches with a short course of treatments.

STRAWBERRY - Smoking cessation. At last there is an easier way to quit smoking. The technology links with traditional acupuncture but instead of using needles, cold lasers are used instead. Clinical studies have shown this method to be over 70% successful.

In our opinion, this British made machine offers a fantastic opportunity for clinics and beauty salons to grow and expand their businesses, as the treatments are in such demand.
